

Yash Gadodia

Product Manager · AI Agents & AI-Native Products

Singapore | pirsquare.yash@gmail.com | +65 8139 4225 | yashgadodia.com | linkedin.com/in/yashgadodia

Product manager with engineering roots, driving AI-native products from zero to production. Defines strategy for agent platforms and conversational AI, leads cross-functional teams across research, engineering, and design, and owns outcomes end-to-end. Ships evaluation-driven products where the measure of success is agent reliability, not feature count.

SKILLS

AI & Product

Agent architecture, agentic capabilities, evaluation frameworks
LLM workflow design, prompt engineering, RAG
0→1 product strategy, roadmap ownership
User research, UX for AI systems

Technical

Python, TypeScript, Golang, SQL
Postgres, API design
Data pipelines, infrastructure at scale

Growth & Analytics

A/B testing, funnel optimisation
Data-driven product decisions
Product analytics, experimentation

EDUCATION

Singapore Management University

BSc (Hons), Information Systems · 2022
Double Major: Business Analytics &
Digitisation & Cloud Solutions

AWARDS & LEADERSHIP

- Winner, Ninja Van Hackathon
- Google Developer Student Club Lead
- National Service: Top 1% of cohort (Combat Diver)

PROJECTS

Voltade Studio — No-code AI agent builder. 100+ agents deployed across WhatsApp, Telegram, and Web for SME clients.

WIMAUT — Agent observability dashboard tracking task success, failure rates, and latency across production AI agents.

Vorank — AI-powered SEO tool. Automates keyword research, content analysis, and ranking strategy.

WRITING

Writes about AI product strategy, agent evaluation, and lessons from building at yashgadodia.com/blog.

EXPERIENCE

Voltade — Founding Product Manager

Jul 2025 – Present · Singapore

AI-Native Agent Platform for SMEs

- Defined product strategy and roadmap for two 0-to-1 AI-native products: Studio (no-code agent builder) and Envoy (conversational CRM), growing Envoy from zero to 100+ SME accounts.
- Established agent evaluation frameworks covering task success rate, failure taxonomy, and latency benchmarks across 230K+ daily AI interactions (99.65% success rate).
- Led cross-functional teams of engineers and designers, embedding agent orchestration as a core competency across every team member.
- Shaped go-to-market around selling outcomes rather than subscriptions, closing 30+ active SME clients on custom agent deployments.

Synthesis Partners — Lead Software Engineer (L3)

Jun 2024 – Jul 2025 · Singapore

Enterprise AI for Strategic Intelligence

- Owned product direction and engineering for an enterprise AI platform serving F500 clients. RAG over 2M+ documents.
- Led engineering on Discover, an intelligence platform where analysts explore millions of documents through topic clustering, network analysis, and theme visualisation — replacing weeks of manual research with interactive workflows.

Ninja Van — Senior Software Engineer (CTO's Office)

May 2021 – Jun 2024 · Singapore

Platform Products & Scale Systems

- Drove Ninja Easy from 0→1, scaling from single-digit daily orders to hundreds within 5 months (13K total). Defined product iterations through data-driven experimentation.
- Owned notification platform end-to-end (100M+ events/day across SMS, email, push in 6 markets). Defined reliability SLAs and scaling strategy for cross-market expansion.
- Launched voice-calling service handling 3M+ calls in under 6 months, leading cross-functional coordination across ops, product, and engineering.

The Bon Pet — Co-Founder

Sep 2024 – Present · Singapore

Consumer Brand (DTC)

- Scaled a consumer DTC brand to ~10K MRR. Automated fulfilment and ops workflows, reducing manual workload by 70%.

AfterClass — Co-Founder & CTO

2020 – 2021 · Singapore

Student Platform

- Co-founded and grew a university course review platform to 50k+ users and 4.5M page views in three months.
